Job Title: QA Engineer – Manual and Automation

Company: Winmore

Position Type: Full-time

Experience Level: 2-5 years of experience.

About Winmore

Winmore is the go-to solution for forwarders, brokers, and carrier professionals seeking to streamline tender management and RFQ workflows with data-driven insights. Our platform leverages artificial intelligence to revolutionize the pricing process, empowering users to optimize bids, track performance, and negotiate contracts with confidence.

Role Summary

We are seeking a meticulous Quality Assurance Engineer with 2-4 years of hands-on experience in both manual and automation testing. The ideal candidate will be well-versed in various testing methodologies, including Functional, Regression, Performance, Smoke, Sanity, Alpha, and Beta testing. This role requires someone with a strong foundation in testing principles who can thrive in a dynamic work environment.

Key Responsibilities

- Implement automated tests using Selenium WebDriver.
- Some Experience in Load Testing tools - Jmeter/Load Runner/Gatling/We Load etc.
- Develop and execute test cases using Java, WebDriver methods, and TestNG.
- Perform Data Driven Testing, Cross Browser Testing, and debug test cases.
- Understand and interpret requirement specifications.
- Conduct Functional, Non-Functional, Mobile, and Regression Testing.
- Convert manual test cases into automated test suites.
- Engage in defect management and test documentation.
- Basic experience with Maven and Jenkins for build configuration.
- Familiarity with SDLC and Agile methodologies and log tickets in Github & JIRA.

Technical Skills

- Automation Testing: Selenium WebDriver, TestNG.
- Manual Testing: Experience in Software Manual Testing Techniques.
- Tools: Eclipse, Jenkins, Maven.
- Databases: Knowledge of SQL Queries.
- Exposure To : React, Node , Github
- Version Control: Experience with tools like GITHUB

Qualifications

- Strong problem-solving and analytical skills.
- Good communication skills and ability to work in a team environment.
- Bachelor's degree in computer science, Engineering, or related field.

This role offers the opportunity to further develop your skills in QA testing and to contribute significantly to the success of our software products. We value team players who are eager to learn and grow with our company.

Work Environment

- Ability to thrive in a collaborative, agile development environment, embracing iterative development practices and open to adopting new technologies and methodologies.
- Strong problem-solving skills and the ability to work under tight deadlines, delivering high-quality software solutions that meet business requirements.

At Winmore, we are committed to fostering an inclusive and diverse workplace where all employees feel valued and empowered to succeed. If you are passionate about technology and thrive in a collaborative environment, we encourage you to apply for the Implementation Analyst position and join our team today.

Please note Winmore is an equal opportunity employer. All applicants will be considered for employment without attention to race, color, religion, sex, sexual orientation, gender identity, national origin, veteran, or disability status.
